

Controls and Emission Technician

Tehachapi-Cummings County Water District

Job Description:

Under supervision, installs, calibrates and repairs water system automated controls and telemetry systems. Maintains and troubleshoots SCADA systems and related networks, to include all communication systems, instrumentation, programmable logic controllers, HMIs and Altronic Internal combustion engine control systems. Responsible for emission's database, testing of IC engines to ensure stack emissions are in compliance, interfaces with regulatory agencies and District emissions consultant.

Qualifications:

Bachelor's Degree in Electronics, Computer Science, and Information Technology, Engineering or other closely related field (preferred) or one to two years of increasingly responsible assignments in control systems development and maintenance. One year experience in SCADA troubleshooting and Allen Bradley programming, including some relevant electrical system work. Experience with a water agency is preferred. Any combination of education and experience that would provide the necessary knowledge and abilities is qualifying. Must be willing to respond to call-out situations on weekends, holidays, during after-hours emergencies and work overtime as needed or directed.

Salary and Benefits:

\$24.72 - \$30.05
Medical, Dental and Vision
CalPERS, 2% at 62
Paid Vacation and Sick Leave
